

Elevation | Downtown Fullerton

Wilshire and Harbor

To promote pedestrianism and bicycling in Downtown Fullerton, OCTA recently installed a bike station powered by solar panels and operated by Bikenation.

Recent analysis of the Downtown region indicated that there exists no map that shows how users of the new bikeshare station are not directed to other stations or nearby bike racks effectively.

Furthermore, no map informs visitors of what recreational activities are nearby, nor of where safe bike lanes and routes are located. A map near the bikeshare station would enhance and compliment the program. One mounted near the bikeshare station may be an option for Fullerton and OCTA to explore.
